TAX1099.COM PROVIDES A TOTAL COMPLIANCE SOLUTION FOR ACCOUNTANTS AND BUSINESSES.

- Collect the W-9
- Send the W-9 to QBO, Xero, or Bill.com
- Validate the TIN/Name
- Import the 1099 data from your accounting software
- Schedule the eFile to the IRS and any state
- Deliver Vendor Forms
- File Corrected forms
- Access forms online to reprint or to report to clients

eFiling is what we do. We have been providing eFile solutions since 2010 and have built many other tools that our clients have asked for along the way.

Now, we are closing the loop in your vendor data collection process. When your client adds a vendor to their accounting software, we can manage the W-9 collection and update the records back to accounting - automatically. We send the completed form back to your accounting software, so you or your client can access it there. We remind vendors to complete the form if they neglect to do so.

All of this is part of our ongoing mission to bring better compliance tools to our clients through Tax1099.com - the fastest way to e-File.
