Improve your response by reducing triage time, tracking patients, and keeping real-time situational information accessible.

Gather Critical Data
Customer-defined fields ensure the right information is captured and filterable. Patient information is instantly accessible for monitoring, analysis, or dispatch.

Communicate Seamlessly
Automate notifications and communicate in real time through dedicated chat channels. All updates available to administrators via web-based dashboard.

Built with Simplicity in Mind
Easy to use interface gathers patient data with options of typing, voice recording, and simple tapping.

Controlled Data Sharing
Role-specific access to patient data and communications. NEMSIS compliant and can integrate with the National Response Agency Databases, ePCR (Patient Care Record) support, and custom in-house systems that support secure data sharing.

Features

QuantaSTAT

FIRSTNET.
Built with AT&T
VERIFIED

Standard Hardware
Triage on mobile, tablets, or laptop and supports encrypted communication.

Streamline Interface & Connectivity
Voice dictation or knuckle tapping compatible and designed for austere connection requirements.

Patient Tracking Made Simple
Capture patient GPS location and vitals and receive automated alerts when vital changes are recorded.

Chain of Custody
Capture relevant victim triage photos and videos needed for compliance reporting.

Agency and Inter-Agency Data Integration
NEMSIS compliant and can integrate with the National Response Agency Databases and ePCR (Patient Care Record) support.

Fully Customizable
Highly configurable for unique Federal, State, and Local response plans.

Q360

" We only add applications to the FirstNet App Catalog that are highly secure, high quality, and relevant to public safety. And we're pleased that QuantaSTAT First Responder is now Listed and available to FirstNet subscribers. QuantaSTAT First Responder will bring public safety additional capabilities to collect and track vital patient information in the field. "

Scott Agnew, Assistant Vice President, Product Marketing, FirstNet Program at AT&T.
