MĪNA | MINAapp.com | Simplify Your Health

MĪNA IS FOMITE FREE #GOTOUCHLESS

THE MISSION

During the current global **COVID-19** pandemic, sharing health information accurately, safely and efficiently while **decreasing the risk of exposure** becomes even more essential. By being accessible to everyone, MĪNA® allows people to feel comforted knowing that they can receive or provide care with **less risk**.

WHAT IS MĪNA?

A mobile application that improves the storage and transfer of health history information for **unlimited profiles** in a safe, efficient, accurate and **translatable** manner.

THE PROBLEM MĪNA SOLVES

• COVID-19 is incredibly contagious through close contact with infected individuals and contaminated objects.

• Public health initiatives are searching for touchless solutions to stop the spread.

• New ideas for fomite-free solutions need to be developed and tested quickly to help now.

MĪNA IS THE SOLUTION

• MĪNA allows for no contact transfer of the complete health history through the use of **QR codes.**

• **COVID-19** risk assessment is already present in the FREE smartphone application.

• Collection of information in **<30 seconds**, decreasing face to face contact and facilitating immediate triage.

HIGH TECH - UNTETHERED PHR

• Provider reader software is **FREE** for 6 months for use during the COVID-19 pandemic.

• Fully integrated with OpenEMR.

• Expandable API for integration with additional EMRs.

• Limited to no additional hardware required for full implementation.

• Multiple avenues of workflow integration.

• Spanish translation for both users and providers.

THE MĪNA WIN-WIN

• **FREE** to all patients with a smartphone.

• Will assist in reaching our goal of improving health outcomes **NATIONALLY** and **GLOBALLY.**
