

BlueMatch Expands Commission-Free Real Estate Services to Florida

Denver, CO (January 8th, 2018)

BlueMatch, an innovator in commission-free real estate services and automating and streamlining the real estate processes, announced plans to enter the Florida real estate market, effective immediately.

As of December 20, 2018, homeowners in Florida in the Tampa Bay, Orlando, and Jacksonville metropolitan areas will be able to use the BlueMatch platform for listing and selling their homes. The rest of Florida will be added by mid to late spring of 2019.

BlueMatch provides its core services, including MLS listing, to home owners commission free.

Company CEO, Jonathan Dobbertin, noted “Over the past three years we’ve been very careful when expanding into new markets. We feel that by entering the Tampa Bay, Orlando, and Jacksonville markets we will be able to provide critical and cost-effective home selling services from day one. Not only is this a big move for BlueMatch, but it’s also a major opportunity for Florida homeowners to take control of the home sale process and, as a result, net more profit from those sales.”

Founded in 2016, BlueMatch has expanded beyond its Denver, Colorado origins to offer real estate services in Colorado, Washington, Minnesota, and Florida, as well as being licensed in Georgia and New York. The company has sold hundreds of millions of dollars of real estate, saving its clients millions of dollars in commission.

About BlueMatch

BlueMatch provides a software platform that gives homeowners the ability to list their homes commission-free with the support, advice, and guidance of a licensed real estate agent. Our goal is to automate the real estate transaction saving the seller thousands in commissions without sacrificing service, price, or days on market.
