EdTechTeam Announces Sweepstakes to Win a Voyage on its Inaugural ‘Summit at Sea’

Teachers and school district employees can enter for a chance to win a ‘Summit at Sea’ cruise aboard Royal Caribbean Symphony of the Seas

IRVINE, CA—EdTechTeam, a global network of educational technologists, is pleased to announce its sweepstakes for their inaugural “Summit at Sea.” Teachers and school district employees are invited to enter June 22 - September 1 for a chance to win a spot on an educational Caribbean cruise hosted by EdTechTeam, a global leader in assisting educators with the application of educational technologies.

Sweepstakes entry is available online at <https://edtech.team/Sweepstakes> . Those visiting the site on the specified dates will be asked to complete an online entry form. The Grand Prize winner will be randomly selected to receive a registration in the EdTechTeam ‘Summit at Sea’ as well as a cabin on the cruise, which leaves out of Miami, Florida. Some restrictions do apply. Please see the official rules for complete details..

The summit, which takes place aboard the brand new Royal Caribbean Symphony of the Seas, will play host to sessions that teach invaluable **Google for Education tools** and other educational technology strategies for the classroom—and in turn—positively impact student learning.

Departing **July 27 - Aug 3, 2019**, Summit at Sea promises to inspire and empower educators to implement new ways of using Google Apps in the classroom by way of inspirational sessions, a demo slam competition, informative breakouts, cutting-edge demonstrations, hands-on workshops and of course, adventurous excursions. Summit attendees are also invited to join an **EdTechTeam Jeep Geo Adventure** in St. Maarten, where the team will be tasked to put their new learnings to the test by utilizing the features of Google’s Geo products. And while the formal sessions will be invigorating, attendees are sure to carry on the conversation during social events on the ship!

“The goal is to feature cutting-edge best practices in educational technology to help shape and promote great teaching,” says Molly Bennett, EdTechTeam’s Director of Summits. “And what better place to get educators excited about Google’s education tools than by teaching them on an Eastern Caribbean cruise?”

Summit at Sea calls upon teachers from around the globe who are doers, leaders and creators to come together and learn, while igniting new ideas in education. By keeping up with today’s tech savvy student, learning will be accessible by using the digital tools students are familiar with.
